

Legal medications have no risks or side effects when used properly.

Answer 1

Answer: That is incorrect. All medications have side effects. They effect people in different ways. There are no guarantees when using medications..that's why when you are given the medications they are given with instructions and side effects.

Answer 2

Answer:

Answer:

FALSE!!!

EVERY SINGLE MEDICATION HAS A SIDE EFFECT! maybe not to you but others. doesn't matter if used properly people react differently.
